EDUCATION

Offensive Cyber Security
Postgraduate specialization · FIAP
2025–present

Computer Science
Bachelor's degree · Universidade Paulista
2010–2014

PROFILE

Software engineer with more than 15 years of experience in Java, Python, and enterprise systems integration. Specializes in connecting heterogeneous platforms, developing services, and delivering containerized solutions, with a focus on interoperability, clean code, and long-term maintainability. Currently expanding this background through postgraduate studies in offensive cybersecurity.

EXPERIENCE

- 🕒 **Senior Software Engineer · Java and Python** Sep 2021–present
Kyndryl · Hortolândia, SP, Brazil · remote
 - Develop the Kyndryl Bridge Extensions Platform, a digital platform that delivers services and applications to customers.
 - Work in a fully Kubernetes-based environment running containerized services and microservices.
 - Build and evolve applications and extensions consumed directly by customers through the platform.
- 🕒 **Senior Software Engineer · Java and Python** May 2016–Aug 2021
IBM · Hortolândia, SP, Brazil · remote
 - Architected and developed a framework integrating ticketing and event systems, including ServiceNow, Netcool, and Remedy.
 - Applied the publisher/subscriber pattern to decouple data sources, destinations, and formats.
 - Integrated REST and SOAP APIs, applications, files, and spreadsheets according to each customer's requirements.
- 🕒 **Software Engineer · Java and Groovy** Jun 2014–Apr 2016
Catelani Sistemas e Telefonia IP · São José do Rio Preto, SP, Brazil
 - Developed a bank payment and billing system for call centers with Grails, Groovy, PostgreSQL, and JasperReports.
 - Integrated the product with Java EE and Asterisk systems, contributing directly to both components.
 - Developed a custom in-house single-page frontend application.
- 🕒 **Software Engineer · Java** Jan 2011–Jun 2014
Pratic Sistemas Informática · Tanabi, SP, Brazil
 - Developed desktop applications with Swing, Firebird, and JasperReports.
 - Built web systems with JSF and PrimeFaces, as well as Android applications.

TECHNICAL SKILLS

Languages	Java 8–17, Python, Groovy, JavaScript, Ruby
Backend and web	Microservices, Java EE, Spring MVC, Spring Boot, JSF, Struts, Grails, Django, Flask, Rails, Node.js, Express
Data and integration	REST, SOAP, publisher/subscriber, JPA, Hibernate, PostgreSQL, Firebird, SQLite, MongoDB
Platform and DevOps	Kubernetes, Docker, Linux, Maven, Gradle, Git, GitHub, SVN
Security	Offensive cybersecurity, Linux systems administration, and secure-development fundamentals
Frontend and applications	Swing/AWT, Android, JasperReports, Angular, and React
